PROJECT NAME : PumpTrack – Fuel Station Finder & Management System

DOCUMENT TYPE : Final Test Summary Report

PREPARED BY : Smitha Shetty

COLLEGE : CSMIT College, Panvel

PROJECT GUIDE : Santham Bharathy

VERSION : 1.0

=====

1. PROJECT OVERVIEW

PumpTrack is a web-based Fuel Station Finder and Management System developed using React.js, Firebase Authentication, Cloud Firestore, and Google Maps. The application enables users to register, log in, search nearby fuel stations, view station details, access navigation through Google Maps, and manage user profiles. Administrators can manage fuel station records and export station data in CSV format.

=====

2. TESTING OBJECTIVE

The objective of testing was to verify that all functional requirements were implemented correctly, ensure integration between application modules, validate system stability, confirm bug fixes through regression testing, and certify that the application is ready for deployment.

=====

3. TESTING TYPES PERFORMED

- ✓ Smoke Testing
- ✓ Sanity Testing
- ✓ Functional Testing
- ✓ Integration Testing
- ✓ System Testing
- ✓ Regression Testing
- ✓ User Acceptance Testing (UAT)

=====

=====

4. TEST EXECUTION SUMMARY

Total Test Scenarios : 25

Total Test Cases : 50

Executed Test Cases : 50

Passed : 50

Failed : 0

Blocked : 0

Not Executed : 0

Overall Pass Percentage : 100%

Overall Result : PASS

=====

=====

5. DEFECT SUMMARY

Total Defects Identified : 10

Critical Defects : 3

High Severity : 2

Medium Severity : 3

Low Severity : 2

Open Defects : 0

Closed Defects : 10

=====

=====

6. MODULE TEST STATUS

Registration : PASS

Login : PASS

Logout : PASS

Dashboard : PASS

Fuel Station Search : PASS

Station Details : PASS

User Profile : PASS

Google Maps : PASS

Admin Dashboard : PASS

CRUD Operations : PASS

CSV Export : PASS

=====

7. ENVIRONMENT DETAILS

Operating System : Windows

IDE : Visual Studio Code

Frontend : React.js

Backend : Firebase

Database : Cloud Firestore

Authentication : Firebase Authentication

Browser : Google Chrome

Deployment : Vercel

Version Control : Git & GitHub

=====

8. MAJOR DEFECTS FIXED

- Dashboard search crash caused by contact datatype mismatch.
- Blank dashboard after searching.
- Duplicate Status field in station cards.
- Admin dashboard chart alignment.
- Pie chart size correction.
- Search refresh issue.

- Contact search functionality.
- Location permission handling improvements.

=====

9. RISKS

- Google Maps functionality depends on browser location permission.
- Internet connection is required for Firebase services.
- CSV content validation depends on spreadsheet software availability.

=====

10. CONCLUSION

All planned testing activities have been completed successfully. All identified defects have been resolved and verified through regression testing. The PumpTrack application satisfies the functional requirements and is considered stable for deployment, demonstration, and academic evaluation.
